## PROJECT EXPERIENCE

**HRMS Pro** — Human Resource Management System *Node.js • Express.js • EJS • MySQL • Docker • Kubernetes • CI/CD*

- Built a full-stack HRMS with admin panel and employee portal — attendance, leave management, holiday calendar, and role-based dashboards.
- Designed REST APIs for employee records, attendance logs, and leave approval workflows; tested all endpoints in Postman.
- Containerized with Docker, orchestrated via Kubernetes, and integrated CI/CD pipelines for automated deployment.
- Optimized MySQL schema and query performance for high-volume HR data operations.

**WhatsApp Broadcast Pro** — Bulk Messaging Dashboard *Node.js • Express.js • React.js • MySQL • WebSocket • Redis Worker*

- Developed REST APIs for campaign management, contact management, message templates, and broadcast delivery tracking.
- Implemented WebSocket-based real-time updates for live connection status and message delivery; Redis workers for bulk queue processing.
- Built a React.js dashboard with batch, template, history views, and optimized MySQL storage for campaign and contact data.

**React Product Catalog** *React.js • React Router • REST API Integration*

- Built a responsive product catalog with React.js and dynamic routing; integrated external REST APIs and reusable component architecture.
